# CWRUPDATE

WINTER 2015

## Project Blue Provides Access to Clean Water

THIS IS A YEAR of special emphasis on the clean water work of Covenant World Relief through Project Blue. In this year, we have created new resources like Kids Helping Kids: Clean Water and the Walk for Water to help you and your church engage in the work of providing access to this precious resource. All gifts to Project Blue go to CWR water projects.

Updates on what is happening because of your gifts include:

- In Haiti—providing a source of water for one community for the first time and a second community whose water source is unreliable.
- In India—drilling 8 new open wells, increasing the water availability of 6 existing wells, conserving 60,000 liters of rain water each year, repairing 8 broken hand pumps, and drilling 12 new bore wells.
- In Cameroon—constructing 3 new

wells, providing 40 bio sand filters, and 30 drip irrigation kits

- In Honduras—a water system is being constructed that will provide access to water for the first time for 106 households and 4 community centers. Each household will also build a toilet and receive hygiene education.

Your gifts to CWR and Project Blue are providing access to clean water for the first time. Stay updated on the progress of these projects by following CWR on facebook, twitter, and Instagram.
