

# A Periodic Health Checkup for Churches

**Just as healthy soil leads to abundant crops, a healthy church produces fruitful ministry.**

The Periodic Health Checkup (pH Checkup) is a tool created by the Evangelical Covenant Church (ECC) to help congregations evaluate how they are doing in three key areas—Missional Identity, Vision, and Leadership. Optimize your ministry's health with a pHCheckup!

**Easy Assessment.** The survey tool can be completed easily online by members of your congregation in 15 – 20 minutes.

**Fast Diagnosis.** When the survey closes, pastors and other designated leaders immediately receive a comprehensive report with scores in three key areas, as well as sub-category scores, providing feedback on the current effectiveness of church ministry and mission.

**Tailored Treatment.** Leaders also gain access to discussion questions, prescriptive scripture references, as well as links to Covenant resources tailored to your congregation's wellness opportunities.

## 3 Scoring Categories

### ✓ Missional Identity

- Christocentric Focus
- Outward Focus
- Caring Relationships
- Transformative Relationships
